WATER TECHNOLOGIES

## **MODULAR COVERS**

**BUOYANT COVERS FOR WATER & WASTEWATER TREATMENT PLANTS**

## FLEXIBLE, FLOATING COVERS

Evoqua's Geomembrane Technologies™ brand of modular covers are used to improve the performance of water and wastewater treatment systems. The modular design allows individual panels (modules) to be easily removed for maintenance, basin draining, and cleaning. The buoyant and durable modules support personnel and shed rainwater and snowmelt.

### BENEFITS:

- Controls foul odors
- Provides thermal protection
- Blocks sunlight to minimize algae growth

## **CONTROL ODORS, ALGAE AND TEMPERATURE**

Covering the water surface with an Evoqua Geomembrane Technologies™ brand floating modular cover essentially eliminates the effects of wind, low temperature, and sunlight, which limits the emission of foul odors, controls heat loss, and inhibits algae growth respectively.

Constructed with durable polyethylene materials, modular covers resist cracks, breaks, chemicals, and UV rays. The modular covers are suited for both aerated and non-aerated systems and can accommodate water level fluctuations.

## COVER & LINER SYSTEMS

With over 30 years of experience delivering solutions for demanding water and wastewater applications, Geomembrane Technologies has grown to become a global leader in cover and liner systems. We are proud to offer total turnkey solutions—from custom-design work, to state-of-the-art fabrication, to installation and commissioning, to aftercare service.
