SUSPENDED COVERS

LOW-MAINTENANCE, LOW-COST TANK COVERS

A COST-EFFECTIVE COVER SOLUTION

Evoqua's Geomembrane Technologies™ brand suspended covers are perfect for small rectangular or circular tanks at treatment plants. The informal design does not require engineering calculations, minimizing costs.

The cover consists of a high-strength coated fabric securely anchored to the tank perimeter, suspended across a tank opening. In some applications, the fabric cover can be designed to be retractable.

BENEFITS:

- Controls odors
- Reduces algae growth
- Helps maintain temperature
- Reduces water evaporation
- Prevents debris from entering tank

FUNCTIONAL AND ECONOMICAL COVERS

Geomembrane Technologies™ brand suspended covers are custom-made to meet the unique needs of each customer. The tank covers capture odorous gases produced by tank contents, inhibit algae growth, and help regulate temperatures; the covers help reduce process heat loss and protect tank contents from freezing.

Suspended covers require very little maintenance and can be installed without disrupting plant operation. The covers can be used both indoors and outdoors. They can support snow loads and rain/snowmelt automatically drains into the tank through a drain hole system.

COVER & LINER SYSTEMS

With over 30 years of experience delivering solutions for demanding water and wastewater applications, Geomembrane Technologies has grown to become a global leader in cover and liner systems. We are proud to offer total turnkey solutions—from custom-design work, to state-of-the-art fabrication, to installation and commissioning, to aftercare service.
